

MappingSpecialists®

www.mappingspecialists.com

*Graphic Design
& Illustration*

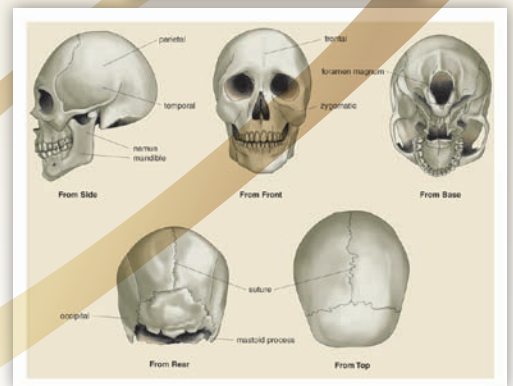

Our staff combines elements of cartography and design effectively to give your maps a unique look. We can combine line art, rendered art, and digital special effects to convey accurate geographic information to your expectations.

We have extensive abilities to design your program from scratch, mesh ideas from examples you provide, or match your established design specifications. With state-of-the-art computer software and faster computers, new and innovative

designs are becoming the rule. In the past, many of these techniques were time consuming and cost prohibitive, so fewer special effects were used. Now, because of our expertise, innovative concepts are routinely applied.

Mapping Specialists, Ltd. stays abreast of current trends in the publishing industry and as a result develops the creative designs that our customers desire. Our goal is to produce illustrations to match your vision.
