## Product Finishing Services

Mapping Specialists offers a wide range of product finishing services. Take advantage of these services for a low-cost method to explore new markets or provide custom products off your existing maps.

Whether it's large-format printing, lamination, mounting to foam core, or custom framing, Mapping Specialists has the services to meet your needs.

### Large-Format Printing

With a variety of small- and large-format color printers, Mapping Specialists can meet your printing needs. Our ability to print up to 60 inches wide helps you maximize your graphic presentations. Ask about the variety of media upon which your images can be printed, such as photo paper, canvas, or banners.

### Print-On-Demand

Let us help you manage your inventory by making your large format, low-demand products print-on-demand. POD enables you to tap into readily available revenue streams at a fraction of the cost of traditional print runs and at a lower risk. We offer sample plots and store your final files in our systems. Fulfillment is as easy as an e-mail placed to our office. We print, laminate (if requested), and drop ship the order directly to your customer.

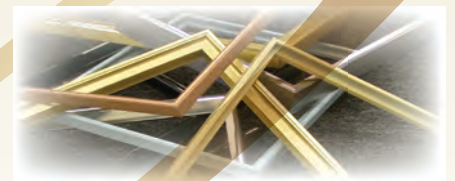

### Lamination

Let Mapping Specialists add value and protection to your products. We offer a wide selection of laminates with our state-of-the-art, 60-inch, heat-process laminator. Whether it's a glossy or matte finish in 1.7 mil, 3 mil, 5 mil, or super-duty 10 mil, the UV resistant laminate protects your print from the elements.

### Mounting & Framing Options

Put the finishing touches on your print-on-demand product by taking advantage of our high-quality custom framing services. Choices include oak, pine, rough cedar, silver, or contemporary black all-wood finishes. All frames purchased from our online store include a foam-core backing and plexiglass for added protection; these are options with other custom framing jobs.
